

ANALYSIS REPORT

SUMMARY:

This analysis report has been prepared by OCHO analytical department.

PROCEDURE:

Identification and quantification of cannabinoids has been performed via HPLC-UV analysis according to OCHO analytical methods.

Samples are analysed in duplicate. The data is reported when the duplicate analysis showed that:

- the 6 standards used in the sequence have a RSD% <2%
- the main component has a RSD% <5%
- other quantified components have a RSD% <10%

PRODUCT INFORMATION:

Sample name: dutchhemp.eu

Sample type: plast

Analysis date: 12 May 2020

Quotation No.: 200513.01

CANNABINOID PROFILE RESULTS:

Cannabinoid	Result (per plast)	
CBD	14,82	mg
Δ -9THC	0,02	mg
Δ -8THC	n.d.	
THCA	n.d.	
CBDA	0,04	mg
CBG	n.d.	
CBGA	<300	ppm
CBN	<300	ppm
CBC	n.d.	
THCV	n.d.	

Note: n.d. = not detected
